STATE OF ILLINOIS

Mr. James T. Ambroso
Engineering /Laboratory Section
Lake County Health Department
3010 Grand Avenue
Waukegan, IL 60085

Dear Mr. Ambroso:

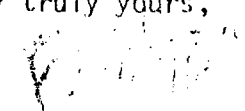

We have received your letter of October 19 and have taken steps to remedy the two points suggested.

1. We have disposed of a small amount of residue left from the cleaning of the machines that was noticed on the eastern property boundary fence. We have also taken steps to inform supervisors and managers of the proper methods of disposing of any and all waste material.
2. We sealed the drums of waste paint and then were able to sell and deliver them, as well as, clean up any residue left. On the other drums containing reusable solvents we are having a laboratory give us a proper chemical analysis so that we may properly dispose of this material to bonifide users.

Further, all the drums on the south side of the building containing solid products such as glass or metal have been palletized, organized and properly handled and found to contain no liquid except for a small amount of rain water.

I hope this meets with your approval and please be assured that we will continue to make every effort to comply with all rules and regulations pertaining to environmental health.

Very truly yours,

F. William Spiegel, Jr.
President
